## TOBACCO IN THE LEAD

INDUSTRIALS LARGELY OCCUPY AT-TENTION OF SPECULATORS.

Volume of Trading in Railway Shares Very Light-Indianapolis Markets Quiet and Featureless.

At New York, yesterday, money on call was easy at 11/2 per cent.; last loan, 11/2; closed at 11/2 per cent.

Prime mercantile paper, 31/2651/2 per cent. Sterling exchange a shade firmer, with actual business in bankers' bills at \$4.88%@ 4.88% for demand and \$4.86%@4.87 for sixty days; posted rates, \$4.871/204.88 and \$4.89@ 4.8914; commercial bills, \$4.86@4.8614. Silver certificates, 60%c. Bar silver closed

at 60c per ounce; Mexican dollars, 48%c; at London, 2714d. Total sales of stocks were 125,601 shares,

including the following: American Tobacco, 24,500; American Sugar, 8,960; Bay State Gas, 2,900; Chicago Gas, 9,900; Distilling, 1,500; Manhattan, 3,100; National Lead, 5,-500; New Jersey Central, 3,700; Northwest, 9,500; St. Paul, 11,900. Yesterday was a dull and uninteresting

day on the Stock Exchange. The volume of business in the railway list was extremely light, the industrial stocks occupying the chief attention of the speculative fraternity and those were led by American bacco and National Lead. Tobacco opened Tobacco and National Lead. Tobacco opened at an advance of %, but the improvement was short lived. At the lower agures there was covering of shorts, which resulted in a rally of 3% per cent. to 87%, the decline on the day being only ½ per cent. Tobacco preferred fell off % per cent. on sales of 200 shares. Lead was strong in early dealings and advanced 1 per cent. On the publication of an official statement made by President Thompson that no dividend on the common stock would be declared, there was a sharp reactionary movement, which was President Thompson that no dividend on the common stock would be declared, there was a sharp reactionary movement, which was not checked until a loss had been made of 2½ per cent. with a recovery of only ½ at the close, the net decline being 1½ per cent. Distilling was in good buying on advices from Chicago that an advance in the price of spirits had been agreed on and the favorable report had the effect of enhancing the values, helped by the announcement of the filing of the report of the experts who had examined into the company's financial condition and which was regarded as being better than was anticipated. An advance of 1 per cent. was recorded, all but ½ of which was held to the close, Consolidated Gas sold up 2 and reacted ½ per cent. Long Island Traction broke 2 per cent, to 6 and closed at 6½, the weakness of the stock being due to the action of Wednesday night's meeting of stockholders in appointing a committee to prepare the plan of reorganization. This stock was sold at 13 on Jan. 18. In the railway list the grangers were most active, but moved within very narrow limits except Northwest, which sold up ½ per cent. to 91% in the early trading, but fell off 1 per cent. in last hour, closing within ½ of the lowest. Manhattan sold up 1½ per cent., losing % of the gain. The rest of the market was irregular, but the fluctuations were merely tractional except in two instances, to wit: Quicksilver preferred, which advanced 3½ per cent. and New York, Chicago & St. Louis & Southwest closed about steady.

The bond market ruled active and higher throughout the day. The St. Louis & Southwestern issues led in activity and figured for \$2.,000 out of the day's total of \$1.

ies led in activity and figured for \$2,000 out of the day's total of \$1,-

Government bonds were strong and 1/2 per cent. up for fours. State bonds were steady.

## LOCAL GRAIN AND PRODUCE. Trade a Little Off, with Fluctuations

in Values Few. the wholesale streets and on Comdission row trade yesterday was hardly up to the average of the preceding days of the week. Weather conditions were hardly as favorable. During the few mild days several carlocus of apples and potatoes were received and a few carloads of oranges, which considerably increased holdings and, temporarily, at least, checked the tendency to higher prices, although \$1 per bushel for potatoes and \$2 per barrel for cabbage are the prices the commission men think will rule during the early spring. Poultry is steady and the demand has improved. Eggs are weak and coming in quite freely for February. Hams are in active request. Grocers are having a very satisfactory trade, with prices in most lines firm. Note revisions in canned goods and dried frults. Other markets are without special feature. revisions in canned goods and dried fruits. Other markets are without special feature. The local grain market continues dull. ## NOT IMPROVING FAST

BRADSTREET'S VIEW OF THE STATE OF TRADE THIS WEEK.

More Activity in Some Industries. but No General Improvement-Net Railway Earnings.

NEW YORK, Feb. 21.-Bradstreet's on Saturday will say: General trade during this, a short week, has been more irregular. The success of the latest emergency bond issue has revived confidence somewhat in the general financial situation. Iron and steel are no more active, recent advances being barely maintained. The outlook in the soft coal industry is more settled, owing to efforts to form a pool and steadler prices and wages are expected. Prices have not reacted materially, concess ons in quotations in cattle, lard and oats being the only losses of note. Cotton goods, it is true, have been barely steady, but hogs, pork, cotton, iron and steel remain firm, while prices for wheat, corn, coffee and refined sugar made fractional advances during the

Prices of wool continue weak, about 200,-000 pounds of XX and above having been picked up by manufacturers below 27 cents. In dry goods, foreign dress woolens are relatively most active, jobbers' supplies being taken about as fast as received. Cottons are quite dull; buyers being 1/3c lower in their views than sellers. Milder, brighter weather has stimulated sales by retailers and jobbers somewhat.

Exports of wheat from both coasts of the United States (Seattle telegram missing) are naturally smaller than usual for a week owing to the holiday, the total amounting to 1,808,978 bushels against 2,572,000 last week, 1,730,000 in the week a year ago, 2,546,000 two years ago and 3,307,000 three years ago years ago.

Net railway earnings for 1894 are not encouraging. Gross earnings of 138 railroads for the year are \$807,628,623 and net \$267,073,872 a decrease, respectively, of 11.1 and 11.5 per cent. from 1893. In 1893 a similar comparison showed a decrease of 1.6 per cent. per cent. in gross and 3.4 per cent. in net. The best showing is made by the Eastern railroads which show the only gain—8.5 per cent.—over 1893. Of the roads showing decreases the best exhibit is made by the Southern roads, showing a decrease of less than 1 per cent. The Southwestern and Pacific roads make the poorest showing—25.8 and 19.3 per cent. decrease.

BRADSTREET'S REVIEW. Bradstreet's financial review for this week will say: The disposition to wait for the conculsion of the bond issue and its effects was even more strongly marked this week. Speculation during the early part of the week, in fact, dwindled away to nothing, and the only apparent interest was confined to some bearish manipulation in the high-priced canal stocks. At the same time the rest of the stock list showed a firm undertone, which was not shaken by the threatened demonstration of the silver men in the United States Senate, or by the news that a small premium was paid for gold not taken from the treasury, and which was wanted in connection with the arrangements of the bond syndicate. The trading for the past week has been entirely professional. Outside interest is at the lowest ebb, and though London has taken kindly to the "New Yankees," as the 4 per cent. bonds are dubbed in the jargon of that market, it has shown no disposition to interest the line. to interest itself in our railroad stocks. The feature of the market was the continuance of selling pressure in New Jersey Central, in the early part of the week. The movement looked to some extent like liquidation by investors, and was accompanied by very gleomy accounts of the coar trade and of the nonsuccess of efforts to bring about a stationary between the coarse. and of the nonsuccess of efforts to bring about a settlement between the companies into obten it. It is, however, beitwed that the low prices for Jersey Central, which touched 81½ on Monday, and of Delaware & Hudson and Lackawanna, which respectively fell to 125 and 156½, were due to bear selling. It may be noted that the Vanderbilts have this week secured an adultional representative on the Lackawanna. ditional representative on the Lackawanna board. The industrials have been strangely neglected, although some manipulations by traders have continued in Sugar, which has shown a litle stronger tendency. American Tabarco has had another break, and to transfer of control of the part of Chicago Gas properties to new parties, and rilliers that a floating debt had been unearthed were both without influence on that

Condition of the Iron Trade. CLEVELAND, Feb. 21.-The Iron Trade Review this week will say: With no strongly marked tendency as to prices, the iron trade is nearing the season that is expected to tell more plainly than has been indicated thus far what sort of a year 1895 is to be, The signs of promise have been accompanied by much that is not so hopeful. Rail buying has not been of the volume the steel companies had looked for, and the 150,000 tons placed in January will be more satisfactory if it were not that on some of it the buyers are not bound to specify in 1895. Thus far specifications on rail contracts have come slowly to the mills. On other classes of mill products the current output is of moderate proportions, and there is no encouragement in the fact that as the season advances work will be more abundant. The sales of the past few weeks for spring delivery make this sure. A good many country electric railway enterprises are afoot, and 1895 promises to maintain the ratio of increase in this demand, shown in a total of 155,000 tons of steel rails for city and intertown electric lines in 1894, against 133,423 tons in 1893; Recent developments have emphazied the uncertainty about the price of coke that hangs over the blast furnaces supplied from connellsvile ovens. The announcement by the Illinois Steel Company that its plate mill will be in operation March 15, means so much added competition in central Western territory for shift plates and tank steel, and there are signs that, in consequence, the district tributary to Chicago may see a more aggressive campaign in other lines by mills whose plate trade will be distributed by the new arrangement.

FROST DAMAGE IN FRANCE CAUSED DEMAND FOR AMERICAN WHEAT.

Early Advance of 1-2e Partly Lost Owing to Sales for Profits Later in the Day-Provisions Down.

CHICAGO, Feb. 21.-Wheat was generally firm to-day on encouraging foreign news and made 1/20 gain early, but realizing at the advance resulted in a reaction which left May but 16c higher at the finish. May corn gained %c, May oats closed unchanged and provisions closed at slight declines. Wheat had lost some of the bearish spirit

with which it closed yesterday when trading recommenced. The reports circulated yesterday with reference to frost damage to the French crop were contradicted. The foreign markets were firm, however, and while the seaboard said they had received no acceptance of yesterday's cabled offers. the advices from there were that bids were close to the market and the tone of foreign advices generally strong. The Northwestern receipts were not so conspicuously heavy as on the two preceding days. The market ruled firm at the slight decline which occurred at the opening and worked itself up by very slow degrees from the time of opening until noon at which time May had reached 53%c. St. Louis kept sending bullish messages and New York also appeared struck with a desire to buy. A St. Louis message received about noon said that the sender of it sold to-day 90,000 bushels of wheat to go to millers in Tennessee and had inquiries for another lot of 40,000 bushels which he expected to sell before the day was out. A New York message had the following: "A Liverpool house here for whom we bought wheat this morning tells us that these orders were given owing to crop damage in France." The fact that cables quoted 90 centimes advance in February flour and 15 centimes rise in March wheat while Berlin was quoted 1 mark higher gave apparent confirmation of uneasiness over there. These latter items caused the advance to 53%c. The taking of profits after the advance referred to was too general to permit of the price being maintained and almough a suspicion became very general toward the end that underneath the smoke of French crop damage some fire existed still, enough wheat was sold to cause a reaction to 53 @53½c with 53½c the latest trading price.

The local feeling in corn was bullish all the forenoon and it took precedence of wheat in the advance which occurred. It opened easy and ½c below the closing figures of the previous afternoon, but soon changed all that and became decidedly strong. May opened at 44½c and about 12 o'clock was in brisk demand for a moment or two at 45½c. There was extensive realizing at the advance and about half an hour from the close the bull feeling was apparently oozing out. At the close there were The taking of profits after the advance reparently oozing out. At the close there were sellers of May at 45c. The early strength it was remarked was due more to the smallness of the offering than to the exsmallness of the opening that to tent of the demand.

A very active session was passed in the oats market. During the early part of the

day shorts were buying and helped the advance. Fluctuations were principally governed by corn. May started a under yesterday's last price, at 29c, sold up to 294c, back to 29%c, up to 294c/29%c and weakening again rested at 2946294c.

Provisions started weak on the very heavy hog receipts. The upward course of the grain market caused a reaction in the middle of the session, but the receipts proved too heavy a load to admit of a firm market and the close was at the declines. May pork and lard each closed 5c lower and May ribs .02½ lower.

CHICAGO, Feb. 21.—The cattle market remained firm. It was less active than on Wednesday, but buyers were not averse to trading on a basis of the day's quotations

trading on a basis of the day's quotations and the supply was bought up at about steady prices. Extra beeves were quoted around \$5.50, but it still takes good goods to bring \$5 and there were few of the 10,000 head offered that had the quality to make them salable at higher figures. From \$4 to \$5 bought most of the dressed beef and shipping steers and \$2.25@3.50 was the range at which most of the cows and bulls were weighed.

range at which most of the cows and bulls were weighed.

Early it was thought the receipts of hogs would amount to 46,000. A little later 48,000 was thought to be nearer the mark, while further along it seemed probable that the total might reach 50,000. With each addition to the estimated supply there was a corresponding sagging of prices, and long before 10 o'clock the market was off a good 10 cents as compared with the lowest time Wednesday. The decline stimulated the demand, but buyers could not be found for nearly all the offerings, for there were not far from 65,000 hogs in the pens. Sales of medium and reavy weights were prin-

cipally at \$3.85@4.10, and \$3.75@3.90 took most of the 150 to 200 pound hogs.

The range of prices for sheep and lambs was lower. The receipts are too liberal even for the present very good demand, and there was a shrinkage in values to-day of 10@20c per 100 pounds. Sales of sheep were mostly at \$5@4.15 and \$4.50@5.25 bought the bulk of the lambs. The range of quotations bulk of the lambs. The range of quotations for the former was \$2.50@4.40 and for the latter \$3,25@5.35. Quotations at St. Louis, Philadelphia, Receipts-Cattle, 10,000; calves, 300; hogs, 0,000; sheep, 12,000.

Discovery of New Iron Ore Fields Has Caused Great Loss Elsewhere.

MILWAUKEE, Wis., Feb. 20.-Solomon S. Curry, president of the Metropolitan Iron Land Company, the largest producer of iron ore in the world, made an astonishing statement to-day regarding the future of that business and predicts a revolution in the industry. "Over \$100,000,000 have vanished," he declared. He said the opening of the Mesaba and other ranges had been a big blow to the Wisconsin-Michigan companies. Mr. Curry conveys the idea that there has been a depreciation of property to equal that great sum. For instance, the Colny mine was once valued at \$2,000,000 and it was sold for a few hundred thousand. Mr. Curry returned to-day from Cleveland where he attended a conference between nearly all of the representatives of the principal iron ore corporations of the United States. "The meeting," he said, "was like funeral dirge. We sobbed

the sight of wealth as great as that of the Rothschilds vanishing into mist, all through the discovery of ore fields from which can be mined more ore than the world needs. This is all due to the development of the Mesaba range, and the billions of tons of ore which can be placed on the cars there at a low price assures the world of an adequate supply of the mineral for a thousand years. This condition confronts us when we had just commenced to believe that a famine in the production of Bessemer iron ore was about to be inaugurated. We had some of the most experienced iron men in some of the most experienced iron men in the world visit England, Spain, Algiers and Cuba and make an examination of the iron mines, and from the reports we believed that in a few years Europe would be obl.ged to call on American for its Bessemer ore. This will prove to be true, for the United State has the ore, and the fields in the old country are playing out."

HANNIBAL, Mo., Feb. 20.—James B. Leake, of this city, thinks he has fallen heir to an estate in New York city estimated to be worth \$100,000,000. His grandfather, James Leake, and two brothers, named Meredith Leake and John L. Leake, emigrated from Engiand at an early day and settled in Maryland and Pennsylvania. James B. Leake settled in New York and amassed an immense fortune. He died several years ago intestate and without heirs, his brothers being his nearest kinsmen. James B. Leake, of this city, has been notified that he is one of the principal heirs to this large estate, and he will leave in claims. He is about seventy years old, and has resided in Hannibal over fifty

one way or the other. What the citizens most fear is that with the troops removed the Indians will have their only source of revenge extinguished, and they will then be driven into desperation by starvation and will commence to murder and pillage settlers and their homes, as in years past.

SUIT FOR \$140,000.

Effort to Recover Money from Harvey M. Munsell, of New York.

NEW YORK, Feb. 20 .- Suit was begun, to-day, in the Supreme Court, against Harvey M. Munsell, former vice president of the Commercial Life Insurance Company, by Wm. T. Gilbert, receiver of the company, to recover \$140,000, which, it is alleged, Munsell obtained from the company by false representations. It is alleged in the complaint that Munsell was aided in obtaining this money by John I. Holly, who was president of the company, and A. C. Hunt, who was secretary. It is claimed that a portion of the money was invested in the purchase of the house and lot in Eighty-fourth street, this city, which is held in the name of the defendant's sister. Mary C. Munsell, who is made a party defendant, with the object of recovering this

property.

Munsell and Hunt were formerly presi-Munsell and Hunt were formerly president and secretary, respectively, of the National Alliance company, and Holly was then president of the Commercial company. It is alleged that in 1890 these three men entered into a conspiracy to transfer all the assets of the National Alliance to the Commercial company, the latter agreeing to roinsure the former's risks and liabilities, and that after the transfer Munsell, Hunt and Holly converted the assets to their own use. converted the assets to their own use.
